DISPOSABLE BITE BLOCKS

Diameter: 21mm

Diameter: 25mm

Bite Blocks assist in preventing patients from biting down on endoscopes during upper GI procedures, minimising the associated risks of endoscope and dental damage.

- Our range are both solid and fenestrated with and with out straps for adult size
- Disposable
- Latex free
- Provided sterile and single Use

<input type="radio"/> BKBM	Disposable Bite Block with Strap (25mm Dia.)	50

DISPOSABLE ENDOSCOPE VALVE SETS

A range of disposable endoscope valve sets are available for Olympus, Fujinon and Pentax endoscopes. A disposable valve reduces the risk of infection through ineffective cleaning and disinfection as well as removing the challenges and involvement of tedious manual cleaning of valves.

Complies with BSG Guidelines, HTM 01-06 Part A section 3 Essential Quality Requirements and follows Best Practice.

- **Reduces the possibility of cross contamination**
- **Removes the need for disposable or reusable valve baskets and the associated costs**
- **Provided sterile and single use**

THERMAL AND NON-THERMAL PRINTER ROLLS AND PRINTER RIBBONS

Thermal

Non-Thermal

A wide range of Thermal and Non-Thermal printer rolls and printer ribbons are available for all machines used within Endoscopy and Sterile Services Departments with a potential for significant savings on your annual spend.

FIND THE CORRECT PRINTER ROLL:

A THERMAL PRINTER ROLL

Is a single ply roll, that is heat sensitive and print is produced via a print head.

A NON-THERMAL PRINTER ROLL

Is a single ply roll, that uses a print cartridge/ribbon to leave print on the paper.
